20340-05	5 Gallon Pail	50 lbs.
20340-55	55 Gallon Drum	500 lbs.

*Most products available in totes. For alternate packaging, contact ITD.

TECHNICAL INFORMATION

Color	Red
Odor	Cherry
pH	9 - 10
State	Liquid
DOT	Not Regulated by DOT

Cherry Surf is a non-hazardous bleach friendly additive with a pronounced fresh cherry scent designed to mask bleach odors. Thick cherry foam generated with your bleach cleaning solutions will enhance the cleaning process saving time and expense. Thicker foam will aid in extending the contact time of your sodium hypochlorite "bleach" to cling on to roofs, walls, etc. Cherry Surf contains an extra penetrating surfactant to accelerate a more effective advanced bleach cleaning along with a pleasant cherry scent that pleases both the applier as well as the home owner. Can be used with most house and roof cleaning solutions, with or without bleach.

DIRECTIONS FOR USE:

Depending on desired foam and thickening action, use 1-8 oz. of Cherry Surf per gallon of bleach/water mix, however applied. Begin with 1 oz. per gallon and increase to desired foam profile and thickness. Cherry Surf is highly concentrated and not designed to be added straight to 12.5% bleach. May be added straight to < 6% bleach. If adding straight to 12.5% bleach, first create a premix of 1 part product to 3 parts water, then add the premix to the 12.5% bleach at the stated dilution rates above.

Do not overuse product - if mixed too strong, solution may become difficult to pull from containers and difficult to rinse from surface. Do not allow product to mix and store with bleach for long periods of time – use mixed product within one week.
