25260-55	55 Gallon Drum	515 lbs.

*Most products available in totes. For alternate packaging, contact ITD.

TECHNICAL INFORMATION

Color	Red
Odor	Characteristic
pH	≤1
State	Liquid
DOT	Hazardous (Hydrochloric Acid)

Mud Away is a complex blend of acids designed to remove red mud, tire tracks, and rust stains from concrete slabs, blocks and brick surfaces. While Mud Away is effective in most cases, for the most stubborn rust stains see Rust Pro Rust Stain Remover.

DIRECTIONS FOR USE:

Always test a small area on the surface to be treated. Use an all plastic pump up sprayer to apply Mud Away. For difficult to remove mud and rust stains, apply full strength to the surface to be treated. Work in 3 ft. by 5 ft. sections to completely cover the surface to be treated, and use a plastic bristle brush or broom to work Mud Away into crevices, cracks and design work. After application, let the chemistry work for you by allowing a minimum of 10 minutes of contact. Stubborn or extremely old and set stains may take up to 30 minutes. Use a high pressure sprayer to remove the treatment, mud, rust and most stains from concrete.

Note: Do not mix this product with any other product nor use on any other surface than listed on this label. Do not allow to dry on surfaces. Always rinse thoroughly. Avoid contact with skin and eyes. Do not allow to freeze. Do not store at temperatures above 120°F. Keep out of the reach of children. For industrial use only.
