Neutra Bleach

BLEACH NEUTRALIZER

- Easy To Use
- Prevents Damage To Surfaces And Equipment
- Highly Dilutable
- Contains Corrosion Inhibitors

PRODUCT CODE

53120

PACKAGING

Product Code	Size Available	Weight
53120-01	4x1 Gallon Case	40 lbs.
53120-05	5 Gallon Pail	50 lbs.
53120-55	55 Gallon Drum	510 lbs.

*Most products available in totes. For alternate packaging, contact ITD.

TECHNICAL INFORMATION

Color	Blue
Odor	Odorless
pH	9.7
State	Liquid
DOT	Not Regulated by DOT

Neutra Bleach is utilized as a secondary rinse following the soft wash process to neutralize corrosive bleach crystals on cleaned surfaces, plants, and equipment. Neutra bleach will remove bleach streak, which results from poor rinsing of bleach solution following cleaning. Spraying Neutra Bleach on and through equipment, trailers and vehicles will neutralize bleach crystals to protect from rapid corrosion, both by neutralizing the bleach solution as well as with active corrosion inhibitors in formulation. Pumps, sprayers, hoses and fittings should be flushed, thus stopping premature repairs and replacement. Use Neutra Bleach to spray sensitive shrubbery and outdoor (non-edible) plants before and after use of bleach, in order to prevent harm. Always rinse plants thoroughly with water following use. Do not leave product to dry on plants.

DIRECTIONS FOR USE:

Pre-rinse all surfaces to be treated. Mix 2 - 4 oz. of Neutra Bleach per gallon of water for low pressure spray applications on windows or to spray down equipment. Mix 2 - 4 oz. per gallon for X-Jet application. Mix 4 - 6oz per gallon for downstream injectors. Rinse lightly.
